Old School Board Members Returned By Big Majority

Once more the inhabitants of our little town can settle down to peace and tranquillity now that election is over.

The old members of the school board were returned to office with a large majority. Wm. Clemis received 171 votes, J. U. Allred 169, I. B. Roberts 68, and D. A. Bennett 60.

Considerable excitement prevailed before and during the election. From all outward appearances both sides were somewhat nervous as to the outcome.

It seems from the writer's point of view there was considerable misunderstanding regarding the platform of the nominees. The outgoing members of the old board (now the present members of the new board) issued a very emphatic statement to the effect that they stood for music in the schools and preparation was already underway for the coming school year. Such action will surely be met with approval by the people, for Raymond's musical talent has always been an outstanding feature of the town.

To the Citizens and Parents of Raymond:

I take this means of expressing to you my appreciation of your support in the recent election for School trustees.

Our schools are the greatest uplifting force, outside of the Home in our community.

The school is the public home of our boys and girls—about 700 of them. The maintenance of these public educational homes not only calls for an item of our greatest expenditure from our public funds, but that they may fully function in the field of human education, formative and informative. It requires an increasing effort, a patriotic devotion and sympathetic co-operation between our teachers, parents and our school board.

We have good reasons to be justly proud of our schools, and the work that they are doing for our boys and girls.

One of the greatest needs of the Raymond public and High Schools today is greater moral support, a keener interest in and a more substantial co-operation on the part of the public. Give them the support that you should and you will give our schools a big boost.

I am sure I express the personal desires of every member of the School Board when I say that we stand ready to serve you in every forward movement remembering always results to be obtained and expenditures to be used.

We ask for your support in raising ever higher and higher the standard and efficiency of our schools.

This is a factor that enters every home in our land.

It is worthy of the best united effort of every parent.

Let one and all realize the responsibility that is theirs and get solidly behind so worthy a cause—OUR SCHOOLS.

J. U. Allred.

I wish to take this opportunity to thank all my friends, and the electors for their time and support during the recent election.

Wm. Clemis

For the sixth successive year Dean Sinclair Laird of Macdonald College, Ste. Anne de Bellevue, Quebec, will conduct an all expense tour across Canada and back, starting from Toronto on July 22, and lasting for 21 days. The party travel in a special train with a baggage car filled up as a sixty-foot dressing-room.

Equipped with a bow-rudder, a new device that will aid in navigating the harbours of Victoria and Vancouver and the waters of the British Columbia coast, the Princess Norah has joined the fleet of the B. C. Coastal services of the Canadian Pacific Railway. She is the eighteenth ship to be built for this work and has just been constructed at the shipbuilding yards on the Clyde in Scotland.

Mrs. V. E. Lybbert Passes Away

The people of Raymond mourn the loss of another respected citizen, Mrs. Verdie E. Lybbert who has been seriously ill for some time, death occurring last Monday, February 11th, at her home. She was a woman of sterling qualities, respected by all who knew her.

She came to Raymond in 1912 from Utah and has resided here since that time. In 1919 she lost her husband Mr. Isaac Lybbert. She continued the battle of life, raising her family of seven children. Mrs. J. G. Snow, Nelly age 22, Jake 20, Carl 18, Enid 15, Jesse 13, and Lyle 11, all of whom are living.

The funeral was held in the Stake House Wednesday February 13th, at 2 o'clock a large crowd paid their last respects to this departed friend.

The speakers were O. H. Snow, N. L. Mitchell and John H. Blackmore, all of whom spoke very highly of the deceased.

The choir was in attendance and rendered several appropriate selections. Interment was made at the city cemetery.

Here and There

Large cargoes of wheat are being shipped to Japan and the Orient through Vancouver these days. It seems like sending coals to Newcastle to send flour to "The Flowery Kingdom."

Some foundation for the old nickname "woolly" west is found in the report that Alberta's wool output for 1928 amounted to 3,033,181 pounds. Altogether the Dominion produced over eighteen and a half million pounds.

Steel is replacing wood in freight service on the Canadian Pacific Railway as 7,500 box cars now on order for the company will be of steel construction. They will have a capacity of about 2,000 bushels of grain and a load of 120,000 pounds.

Fur-farming is developing many branches, one of the most recent being the organization in Manitoba of the Manitoba Muskrat Breeders Association. The body plans to study muskrat breeding conditions and to investigate all phases of the industry.

In a recent speech at Kitchener, Ontario, E. W. Beatty, chairman and president of the Canadian Pacific pointed out that the average freight rate per ton per mile in Canada is about 5½ per cent lower than in the U.S., and that the average of Canadian grain rates is 40 per cent lower.

The Trans-Canada will cross the continent in an hour and a half less time eastbound, and an hour less westbound than it did last year. This does not mean that Canada has got any smaller, but that the Canadian Pacific Railway is running the famous flyer on an improved schedule.

Penny postage, inaugurated at Christmas, is working well and bringing about a notable increase in letter mails from Canada to the British Isles, according to federal postal officials. It is estimated that the increase in the course of a year would be such as to offset the \$200,000 estimated reduction in revenue by the penny rate.

In Manitoba, there is one tractor for every 4.6 farms; in Saskatchewan, one for every 4.7 farms; and in Alberta, one for every 7.5 farms. If all the tractors were hitched together, how long could it take a garage mechanic to reach the moon.

Canadian seed wheat is in considerable demand in South America according to officials of the agricultural department of the Canadian Pacific Railway at Winnipeg. A ton of seed wheat was recently shipped from Brandon to Peruvian wheat ranchers, and it is expected that further orders will come from the South American republic.

How Many Were Like Me?

The vote has been cast and the political atmosphere allowed to cool, and with this chance for meditation. Personally I would like to know what it is all about.

Like a good citizen on the day of the 11th, I donned my coat and cap and headed for the polls. My mind was made up, I had heard some talk of music in our school, of Mr. Mitchell being let out and the like. I had also read of splendid financial report of the present school board and a signed statement that Mitchell had resigned and a movement now on foot for music in our school. This together with my knowledge of the character of the men on this board made me feel no need for a change.

A sudden attack of "Sweet tooth" caused me to halt and enter a restaurant for a chocolate bar. While at this business a voice called out—

"Have you voted yet?" "Just on my way now." "We must have, he said, a little new blood on our new board."

You know what they have done on this and that, you know how they have almost fired Mitchell only allowing an increase of \$1.50 per month and \$20.00 in the whole year, he is a good fellow and we must have him back in our school.

The fervent appeal rather won me. The new men I argued, will be as good as the others and I must try to help

th, but again within a few doors another sentinel hailed me and had his say.

It was all Mitchell's fault had he done this and that all would have been well, the board certainly did their part and just think it would mean to grant this raise additional taxes and sums amounting to \$12,000.00 per year. This was getting interesting it was appealing to a tender chord. I got away beyond his zone so he was dismissed but I was being worried. Again at the Merc.

and at the town office the talk was the talk was fluent. Four times within block I was detained and confessed, changed my mind one way then the other. I was not familiar enough

with details to argue one way or the other, so earnest, so fervent were their appeals.

I stepped to the box to vote, the judges looked me over then at their slips—"no vote for you," I was relieved yes embarrassed, but when explained, I blamed no one but myself and reasoned to do my part next year in a little more citizen like manner.

I hurried home my mind crowded with issues and questions to thresh it out. I had been whipped and it would not happen again.

In the quiet retreat of my mind I tried to formulate the question I tried to form a definite reason for this election of just two trustees. All the reasons seemed to center around music in the schools versus Mitchell as director. He had resigned under the old board because they would not or could not grant him his price.

From the Mitchell faction I was definitely convinced the board would not grant the raise and had not done all in their power to meet this demand.

From the board and heralds I was convinced that they had gone the limit and to go farther would mean much more taxes some stating as much as \$12,000.00 per year. This much was fine and I believe debatable I believe there are two good sides to look into but some enthusiasts from board helpers stated that Mr. Mitchell was not a music teacher, he was not keeping up with his work, he spent too much time outside and therefore could not support him longer, one private but prominent citizen definitely

no vocal teacher and that one was now being considered.

We have in our town a very fine paper one which would be glad to publish both sides of a question of this kind where facts could be tabulated and read by all.

Personally as a citizen of this town I would like a statement as to why taxes would necessarily have to be raised if Mitchell were granted a raise I cannot see it from the school report. Second, if Mr. Mitchell is not or has not or can not fill his position as a teacher a statement to this effect. Yours for the growth of a bigger Raymond.

A Citizen.

"Pickles" Goes Over Big

Ice Carnival

A Huge Success

The local skating rink presented a scene of gaiety, clad in festive colors last Wednesday night when Raymond held its first ice carnival. The evening was a huge success and nearly 300 people were present to enjoy it. The hockey game between the business men and the factory crew was a battle royal, creating much merriment among the spectators, although the players took the matter very seriously. Superior ability with the sticks resulted in a win for the Sugar Tramps 3-1.

The fact that Raymond is rapidly developing some very clever skaters was shown in the races. Premier honours went to Elmo Christensen who won the men's speed race, second in the broad jump, and finished strong as the final man in the relay. Pete Dumais won the broad jump easily. Miss Herma Paek took the lady's speed race by the length of the ice. Howard Melchin was the speedy lad who won the junior race.

Prizes for the best costumes went to: Ladies: Misses: Mary Redd and Gertrude Redd, dressed as rabbits.

The entire evening was a success and it is an assured fact that Raymond

will have a skating party and Moccasin dance at the rink in the near future.

The Ice Carnival Committee wish to thank the business houses for their generous support in donating the prizes.

NORTHCOTT TO PAY WITH LIFE

Gordon Stewart Northcott was at last condemned to be banged at San-Quentin prison April 15 for the murder of three youths.

The court room was heavily guarded to prevent mob violence, when the condemned was sentenced.

"An outstanding production of our local talent," was the popular verdict of one of the largest crowds ever assembled in the Opera House which witnessed last week's presentation of "Pickles," the light Opera played by the combined Raymond Mutuals.

Seldom has a play of local talent passed off with such perfect portrayal of each character. Each of the principal characters were admirably fitted to their part. Miss Marion McLean in the role of a gypsy girl was unbeatable and her dancing was a feature of the evening. Lee Brewerton as the "live wire" advertising agent even made the audience believe that "Peter Piper Pickles" was the most celebrated bit of nourishment to be found anywhere.

Thos. Allan and Solon Low in the comedy parts of "Kinskie's" faithful watchdogs, were a comedy team bordering on professionalism. They needed only to approach the stage to set the audience howling with mirth. Rulon Dahl as the pompous police captain with his dignified manner, in contrast to his henchmen, was a touch that made their scenes perfect.

N. L. Mitchell as Pennington of Peter Piper Pickles fame displayed stage anger that left George Hutchinson, waiter, trembling for fifteen minutes after he left the stage. Mrs. Lydia Hunter portrayed emotion that brought tears to the eyes of many of the audience.

Miss Ruth Holt, as Miss Pennington and Deal Mendenhall as her artist lover enacted some very pretty love scenes told in song.

Wm. Rouse as the rotund landlord of the Inn fitted his part admirably. Azel Stevenson as the Gypsy chieftain, and Miss Lura Redd as the maid added touches of character acting that completed a perfect whole.

The choruses rendered their part in an exceptional manner and every one deserves much credit for the success of the performance. Such musical training should early be encouraged in future years.

The orchestra deserves their share of the credit for their part in this success. It seems that they had their parts down to such a point that they harmonized perfectly with the singers.

Much praise is due Wm. Stone, director of the production for "putting over" such a mammoth enterprise.

In this he was ably assisted by Paul Dahl, business manager, Ed. Hawk and Sam Dyson, who were responsible for the effective lighting and stage setting and Mrs. Norma Wood and Honnie Nalder, responsible for the appropriate costuming.

Weed Menace

In an effort to secure a stranglehold upon the noxious weed situation throughout the province, and for the purpose of providing every facility known to science in the fight against the spread of weeds, the department of agriculture, represented by Hon. George Hoadly, is asking the legislature for the passage of a new bill entitled, "Noxious Weeds Act Bill of 1929."

Must Destroy All Weeds

Every owner or occupant of lands shall be required to destroy all noxious weeds or weed seed on the land he owns or occupies, with the option of a court conviction and a maximum fine of \$50 and costs for failure to comply with the regulations. The act will also compel all irrigation and railway companies to seed white clover timothy or western rye grass, or a mixture thereof, on all earth works made by them.

Steel Cars Now for Freight Service

Steel is replacing wood in freight service and seventy-five hundred of the new freight cars now on order for the Canadian Pacific will set a new standard in grain and general freight service. These cars are not in replacement but in addition to the wood cars already in use, and will furnish a greater margin of safety, more speed and longer service while eliminating leakage.

They will have a capacity of 2,000 bushels of wheat and will considerably speed up the movement of grain. Rivetting of all joints and connections will reduce to a minimum possibility of loss of grain and the car itself will be more solid and will possess greater rigidity. The roof of the car will be steel as will also the whole structure, but the sides will be wood lined inside.

Additional safety will be provided by a new type of truck having a cast steel frame. These truck side frames which represent a new standard of Canadian

Pacific equipment, are one integral casting. Elimination of parts in the car proper is another noteworthy feature.

Dimensions of the car are 40 feet 9 inches in length, 8 feet 7 inches high, and 8 feet, 7½ inches wide. They will have 5 foot side doors and a capacity of 120,000 pounds.

The new cars represent an important advance in railway freight transportation on this continent and they have been developed more directly to keep pace with the development of the west. In recent years crop acreage has increased. Car loadings have increased in like measure. Improved harvesting machinery has speeded up delivery to the rails and necessitated still more efficient handling on the part of the railway companies.

Delivery of the new cars will be made in ample time for the harvest of 1929 and the Canadian Pacific may be expected to again break the record of crop handling.

Red Rose Orange Pekoe Tea is truly economical. A half pound makes almost as many cups as a full pound of cheap tea costing 50c to 60c.

Education and Leisure

It has long been the boast of Western Canada that its people are intensely interested in education. With pride the people have drawn attention to the fact that in towns and villages the most outstanding structures are the schools, while the vast expanse of prairie has been dotted with rural schools, the number of which in the three prairie provinces now approximates closely to ten thousand. These thousands of rural and village schools, larger public and high schools in the towns, still larger schools, collegiate institutes and colleges in the cities, and the three prairie universities, are but the visible expression of the determination of the people of the West that the children of this and future generations shall not only thus be "prepared for life," but that they shall come to realize that education is life, inasmuch as it is both the accompaniment and the experience of life.

It is said that education is entering upon a new era. No doubt it is, because in this changing world we are always entering upon new eras, and education must do likewise. The basic aims, the great objectives of education abide. Methods change and the setting varies, but it remains true that health is fundamental, the tools and techniques of learning are necessary, citizenship is inescapable, service is a radiant star, home is man's great joy, leisure is liberty, and character is humanity's highest good.

Education is not confined to school and college. It does not even begin there, and certainly it does not end there. School is but a means to an end. Through it certain knowledge is imparted, but if that were all our schools would be a dismal failure. At best, schools in imparting knowledge give us tools to use, and, to some extent, train us how to use those tools and others which we will acquire as we journey through life. But education is not passing examinations from one grade to another or the attainment of degrees. Education is a training of the mind and equipment to enable us to meet all the joys and pleasures, the pains and sorrows, the duties and responsibilities, the vicissitudes of life, and put them all to the highest possible use.

An educated nation, it has been said, is one that has learned to pursue its interests to the point of a true and catholic culture, to penetrate its prejudices until it has come at truth, and to discover that every man has a contribution to make to the great society in the service of which he attains to freedom.

Five or six years ago, the National Council of Education held a great and noteworthy conference in Toronto, the theme of which was "Education and Life." In April next, it will convene another conference in Vancouver, with the general scheme of its programme "Education and Leisure." The subjects for discussion by noted speakers and authorities from all parts of the world include Literature, The Moving Picture, Music and the Drama;

The Radio; Organized Play, Recreation; Hobbies and Handicrafts; Health in Relation to Leisure.

Life is divided into hours of work, and hours of leisure. It has, however, become customary to consider education almost wholly in terms of work, and little thought has yet been given to education in its relation to leisure. The Lord Chief Justice of England, recently said that "second only to drink, the real cause of crime is the difficulty of finding healthy recreation and innocent amusement for the young." The free hours of a large proportion of youths and adults are occupied with harmful and trifling pleasures. We must realize that it is when the young are idle that they form the habits which may later ruin their lives.

Modern machinery which is steadily displacing man in the production of man's material needs, is producing an ever increasing number of leisure hours. Education in the present and future must concern itself with the provision and enhancement of interests to occupy the leisure of both the child and the adult. There must be interests which education alone can give if men are to gain the faculty of using leisure easily, happily and fruitfully.

Such interests can be found in good literature, in music, in useful hobbies and handicrafts, in organized health-giving play and recreation. Organized games provide education in self-control. To "play the game" is instinctive to youth; developed to its fullest, this natural gift becomes an asset of great national worth and importance in the evolution of a high type of citizenship.

Labor unrelieved by recreation produces fatigue, and fatigue produces hate, lawlessness and despair. Recreation unregulated, unregulated, produces vice, degeneration, and helplessness. Play is the natural expression of all the innate instincts. When a man is natural and at his best, it is his spirit that plays.

Parents and teachers may well give greater heed to the trend of these modern days, and devote greater and close attention to the encouragement of proper use of the leisure hours of the children under their care.

The First Ten Pounder

Englishman Now On Western Farm Intends To Purchase Land

Thomas Turnbull Fletcher, of Morpeth, England, described as the first ten-pounder to arrive in Canada, found a place within twenty-four hours after reaching Winnipeg. Under the new scheme under which single British subjects of good physical condition may obtain passage for ten pounds, Mr. Fletcher qualified, and is now placed on a farm at Togo, Saskatchewan, under the direction of the C.P.R. Colonization Department. He is possessed of a little capital and intends to purchase land.

WHAT WILL IT DO?

Women are saying: "Pinkham's Compound keeps me fit to do my work." "I was nervous and all run down. Now I eat better and sleep better." "It helped my thirteen year old daughter." "I took it before and after my baby was born." "I am gaining every day."

W. N. U. 1772

Boys Kill Timber Wolf

Animal Attacked Them In Woods Near North Bay

Marshall King and William Hall, two pupils of the Chapleau Indian school, are in proud possession of the carcass of a large timber wolf which attacked them when they were driving through the woods with a sleighload of kindling wood.

Infuriated by injuries sustained in the jaws of a steel trap, the beast sprang upon the sleigh.

The boys halted the horses and belabored the wolf with slabs of wood. Unable to make their blows prove effective, they jumped to the ground and continued their fight. Finally a well-directed blow caught the animal on the head, killing it.

Tooth Weighs 300 Pounds

The largest tooth in the world, 11 feet 2 inches long and weighing more than 300 pounds, has just arrived at the Harvard Dental School Museum. It came from the jaw of a mastodon, and scientists estimate that it is more than 50,000 years old. Before the tusk was found in Alaska, the largest known specimen was the 9-foot one in the Carnegie Museum, Pittsburgh.

Mindard's Liniment for the Grippe and Flu.

Using Radio To Send Fingerprints

Experiment Tried At Scotland Yard Is a Success

Experts at New Scotland Yard are carrying out experiments in the transmission by wireless, of the photographs and fingerprints of criminals.

Remarkable success has already attended their efforts, and Viscount Riving of Vimy, the commissioner, and various high officials who have seen the results, have expressed their approval of the venture.

This application by the police of the latest outcome of electrical research, will, in time, have effects of far-reaching importance in the prevention and detection of crime, and the thwarting and capture of criminals.

At present the description of a wanted man is sent either by post or telegraph, to various police forces, and frequently the details are of a somewhat vague character; but, however informative a description may be, it obviously lacks the completeness of a reliable photograph, and it does not convey the vivid mental picture which is so helpful to every policeman.

One photograph with which an experiment was made, was that of a criminal named Brown, who murdered Police Constable Gutteridge, and the transmission was so good that the wireless picture was easily identified. Fingerprints of famous criminals have also been transmitted with equal success.

It may be a long time before there is a chain of police wireless stations in England, but officials are certain that they can already transmit to stations in America and on the continent, and thus supply the authorities of various countries with the photographs and fingerprints of fugitive gangs of international thieves and others whose arrest is desired.

Radio Staff Puzzled

Discovered Beads Worn By Pianist Were Cause Of Vibrations

The mysterious reverberation in the KGO radio studio at San Francisco, which caused no end of trouble to the station staff has at last been found.

After an expert piano tuner tried for hours to remedy the trouble, all of the station's pianists were summoned to appear and Eva Garcia was found guilty.

Miss Garcia was "ordered" to leave her beads at home when she played at the studio. Sensitive microphones picked up a note in "pitch" with the beads and sent the vibrations over the air.

Freedom From Asthma. Asthma is one of the most distressing troubles, sudden in its attacks and prolonged in its agonies. Frequently many things are tried, but nothing seems to give hope of relief. Dr. J. D. Kellogg's Asthma Remedy is the one help which can be depended upon. If you have tried other remedies without success, do not fail to get at once a package of this uniformly successful preparation.

"Should an airplane be referred to as 'she'?" asks an inquiring subscriber. All except the mail planes

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

If we dig down into the earth to a depth of about 25,000 feet we find a temperature of 200 degrees.

Need Continual Warning

Public Seem to Forget Menace of Level Crossing

While the ideal thing would be to eliminate every level crossing in the country—and steps toward that end are being taken—it will be many years before this menace to public safety is a thing of the past. In the meantime the public must be continually warned.

If every person would get it firmly fixed in his mind that each level crossing is dangerous and that each one must be so regarded when approaching it, the death toll from this source will be materially reduced. Motorists cannot afford to fool with level crossings.

RHEUMATIC PAINS DUE TO THIN BLOOD

Relief Comes Through the Use Of Dr. Williams' Pink Pills

The most a rheumatic sufferer can hope for in rubbing something on the swollen, aching joints is a little relief, and all the while the trouble is becoming more firmly rooted. It is now known that rheumatism is rooted in the blood, and that as the trouble goes on the blood becomes still further thin and watery. To get rid of rheumatism, therefore, you must go to the root of the trouble in the blood. That is why Dr. Williams' Pink Pills have proved so beneficial when taken for this trouble. They make new, rich blood which expels the poisonous acid and the rheumatism disappears.

There are thousands of former rheumatic sufferers in Canada, now well and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains of this dreaded trouble. One of these, Mrs. W. F. Tait, McKellar, Ont., who says:—"I am one of the willing ones to tell you of the great benefits I received from the use of Dr. Williams' Pink Pills. After lying in bed for seven weeks suffering untold agony with inflammatory rheumatism, relief finally came through the use of this medicine. I could not move in bed only as they lifted me, and I could not sleep when opiates were given me. The medical treatment I was taking seemed of no avail. Then I was advised to try Dr. Williams' Pink Pills, and soon I began to get relief. After taking six or eight boxes the rheumatism was banished and I have never felt better in my life. It is several years since this happened and I have had no return of the trouble since. I may add that I recommended the pills to two of my friends who were suffering with

rheumatism and the pills were equally effective in both cases."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, indigestion or nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Western Canadians To Tour Maritimes

Principal Towns and Beauty Spots Will Be Visited

In an effort to bring closer together the East and the West, Dr. F. W. Fallis, publisher of the "New Outlook," the official periodical of the United Church in Canada, is organizing, with the co-operation of the Canadian National Railways, a tour of the Maritime provinces for the benefit of Western Canadians. The tour will leave Toronto by special Canadian National train on June 17, visiting Ottawa, Montreal, Quebec, going by steamer up the Saguenay River, thence by rail to the principal towns and beauty spots of New Brunswick, Nova Scotia, and Prince Edward Island. More than 80 persons from Winnipeg and the west are expected to take part in the tour, which will be personally conducted.

Extensions To Hotels

C.P.R. Increasing Accommodations At Calgary and Victoria

Extensions to the Palliser hotel at Calgary and the Empress hotel at Victoria, involving an expenditure of over \$4,000,000 by the Canadian Pacific Railway, have been decided upon. At the Palliser there will be an addition of four floors with 200 rooms and a large extension to the ballroom—which enlargements are expected to be completed by Stampede week. The Empress will have an entirely new wing with a 200-foot frontage to the water and a 220-foot frontage on Humboldt street. An addition of 270 rooms with baths will bring the total number to 550.

A venerable Scot purchased a radio set. A few days later his friends asked him how he liked the set. "Well, it's aw right to listen to, but those bulbs are nae guld to read by."

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

THE GINGIVAE OR GUMS

Nature is a watchful Mother and so it is that she has clothed the teeth about with tissues that fit and wind about each tooth snugly like a protective garment.

These tissues, then, that so ably protect the delicate tooth membrane and supporting structures from exposure, and injury, are spoken of as the gingivae or gums.

Among the tissues of the mouth, the gingivae stand out in importance because of the fact that while in health they are barriers to disease, yet when injured they become the portals of entry to infective processes that are ever assailing the body defences.

For this reason the maintenance of the gingivae in health, is of utmost importance.

These tissues have no direct attachment to the tooth at its neck, being simply fitted around closely; and they are so designed that food crushed between the teeth glide along their sloping surfaces to either side of the arch. Thus, all lodgments of debris which, in their decomposition, would give rise to offensive and disease producing compounds, are prevented.

Countless numbers of tiny fibres, embedded in the gingivae, pass to and fro in all directions and give them their firmness and elasticity. Where suffering through injury, or other cause, these fibres become weakened with consequent flabbiness of the gingivae exhibiting a lack of tissue tone.

The gingivae are particularly rich in blood supply as is evidenced by their color. By this color there is provided the rapid repair of tissues, following upon the frequent minor injuries and scraping that they are subjected to in the chewing of food. Firm and resistant as are the gingivae to minor injuries, yet where subjected to long-continued and repeated irritations, a mild inflammation is set up; progressing, leads to more serious disease that at once becomes a menace both to the teeth, and to the health of the individual.

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

Elephants are keen neither of sight, or scent, nor of hearing in comparison with other jungle inhabitants.

Wonders Of Suez Canal

Business Has Grown Enormously Since Waterway Was Opened In 1870

Advices from Port Said express the opinion that the passing through of the huge Singapore Dry Dock in two sections is the greatest feat ever accomplished by that waterway, although usually ships pass through the canal in 15 hours. In 1870, the year after the canal was opened, the average time of passage was 48 hours, and the largest ship accommodated was one of 4,414 tons. Today ships of 27,000 tons pass through the canal. Last year 5,545 ships with a total net tonnage of 28,962,048 passed through with transit receipts amounting to \$42,000,000. In 1870 the number of vessels was 486 with a tonnage of 433,609, while the receipts amounted to \$5,584,000.

Could Not Sleep Heart Would Start Pumping and Pounding

Mrs. Fred. P. Averill, 136-12th Ave., Calgary, Alta., writes:—"I was bothered so much with my heart I could not sleep. I would wake up in the night screaming, and my heart would start pumping and pounding. A neighbor lady told me to try

so I started taking them and I can truthfully say I am a different woman. Altogether I only took two boxes." Price 50c a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Sparrows at Mayence, France, are artistic. Before building nests they wait for an annual rose carnival, then make their homes with confetti picked up from the streets.

The most important phase of aeronautics which is developing in Canada is the use of aircraft in mineral exploration and development.

ASPIRIN

You doubtless depend on Aspirin to make short work of headaches, but remember that it's just as dependable an antidote for many other pains! Neuralgia? Many have found real relief in an Aspirin tablet. Or for toothache; an effective way to relieve it, and the one thing doctors are willing you should give a child—of any age. Whether to break up a cold, or relieve the serious pain from neuritis or deep-seated rheumatism, there's nothing quite like Aspirin. Just make certain it's genuine; it must have Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin causes Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Necessity Of Sowing Pure Seed If Grower Expects To Secure Highest Returns From His Farm

While admitting the importance of high fertility and good cultivation as essential for a good seed-bed, let us not forget the importance of sowing good sound seed, pure as to variety, free from weed seeds, of high vitality, and which has been treated for smut.

The time never was more opportune or more ripe for the necessity of sowing pure seed than it is today.

With the ever-increasing weed problem, and the multiplicity of varieties that are on the market, the time is at hand when we must sow pure seed, if we expect to reap the highest returns from our farms.

The wide-awake farmer does not wait until the last minute to prepare and clean his seed, and will always be found ready when seedling time arrives, to sow seed that has been cleaned, of good germination, and which has been treated for smut.

The practice of the Modern Experimental Station, in regard to seed grain, is to clean all grain intended for seed purposes shortly after freeze-up and to forward two-pound samples to the Dominion Seed Branch, Winnipeg for grading and germination test.

With the long winter days, when the farmer has ample time to spare, why not crank the little gas engine, start the fanning mill going, get the seed grain ready, and be prepared for the big rush in the spring.

For those farmers who are intending purchasing seed grain, now is the time to get busy. Don't delay, but secure your seed early, then you will have no worries about seed grain when spring opens up.

In a seed grain survey made in Manitoba, one farmer was sowing seed supposed to be Marquis, but upon analysis, only 60 per cent. was Marquis, while the other 40 per cent. consisted of weed seeds, and other varieties of grains.

We cannot hope to produce grain that will maintain our high standards on world markets if more attention is not given to the seed we sow. Experimental Farm Note.

Canada's Northland

Department of Interior Is Exploring Northwest Territories

Much is being done by the Department of the Interior to organize and explore the vast territories lying to the north of the prairie provinces. It is fully realized that development of the natural resources will depend on a robust native population and an abundance of wild life. In conformity with this realization game preserves have been set aside for the sole use of the natives; expert investigators have been detailed to examine and report on wild life conditions; experiments have been conducted with a view of the introduction of new species of animal life, and regulations have been enforced with regard to the destruction of predatory animals.

Solved the Difficulty

My little niece's mother was trying to get the hated spinach down the child's protesting throat!

In the middle of her attempts Shirley—who is three and also at the make-believe stage—said, "Let's play, Mamma."

"Well, all right," answered mother. "What shall we play?"

"Let's play you're the little girl and I'm your mamma."

"Very well," agreed her mother.

"Now you eat the spinach!" commanded Shirley.

Kid: "My father is a radio announcer."

Kid: "So is mine."

Kid: "Well, I bet my father is worse than your father."

"Are you a doctor?" she asked the young man at the soda fountain.

"No, madame," he replied "I'm a fizzician."

"I want your legal help. Schulz knocked out one of my teeth."

"I will get you compensation."

"But you can't get compensation from a dead man."—Lustige Blätter, Berlin.

Influence Of Sunlight

Experiments Show Pigs Eating Outside Take Less Feed

In recent Iowa swine feeding tests one of the important observations made was the effect of sunlight on nutrition. Those pigs that were fed out in the open made about the same daily gain as the ones fed inside. But they did it on less feed, states a writer in Live Stock Markets.

The pigs fed inside required an average of 425 pounds of feed for each hundred pounds of gain to reach a weight of 225 pounds, while those fed in the sunlight reached the same weight with only 391 pounds of feed for each hundred pounds increased weight. The outside fed pigs made \$1.02 more per head over feed costs than did those fed inside.

John M. Evvard, in charge of the experiments, thinks sunshine was responsible. He is convinced of this because the outside fed pigs did not do nearly so well during the early part of the feeding season when the days were short and cold. After the days became longer and more mild, there was a marked improvement in gains.

The conclusion is that probably in midwinter, it is well to feed pigs inside. They should, however, have alfalfa hay as a source of vitamin D to take the place of the sun's rays, and to aid in assimilating minerals. As soon as the days lengthen and the weather becomes more mild feeding outside will pay.

Paris Model

A charming little Parisian model smartly shirred across front, fashioned of English print with white pique collar and cuffs. Fashioned of printed wool jersey, with plain self fabric contrast, navy blue wool crepe, tan linen with brown French blue sateen with tiny white polka dots with white pique or pale blue chambray, are very striking and serviceable. Design No. 503 comes in sizes 2, 4, 6 and 8 years. The 4-year size requires 2 1/2 yards of 36-inch material with 3/4 yard of 36-inch contrasting. Pattern for full cut bloomers gathered to lacebands included. Price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Key To Markets

The Canadian Agricultural Products Representative in Great Britain, W. A. Wilson, claims that the quality of Canadian bacon is satisfactory to the British trade. The key to the markets now, he says, is "production." Greater numbers of hogs and a steady increase every year are what the British buyers of Canadian bacon would appreciate most.

"Pop, how many legal holidays are there this year?"

"I dunno, son, better ask a bank clerk."

Best Peas For Canning

Experiments Show Alaska Variety Gives Highest Yield

The canning of peas has grown into an industry of considerable extent in many parts of Canada. In the province of Nova Scotia it has become an established industry. To find out the best varieties of peas to grow for this purpose a series of experiments was carried out at the Experimental Farm, Nappan. The important factors looked for as described in the report of the Superintendent, published by the Department of Agriculture, Ottawa, in the varieties were uniformity of ripening, freedom from worms and disease, and the yield of crop. The variety Alaska, gave the highest yield of 7,895 pounds of marketable seed to the acre. This variety produces a smooth round pea, with pods well filled that ripen fairly uniformly and has the appearance of excellence for canning purposes. Horsford Market Garden, yielded at the rate of 5,445 pounds of marketable crop per acre. This variety did not ripen as uniformly as Alaska and is more susceptible to blight at the base of the stem. The Lincoln gave 6,816 pounds of crop to the acre of a very smooth round pea that is slow in developing. Advance, a pea of medium size lacks uniformity in ripening and blights early. It yielded 5,445 pounds of marketable seed per acre.

Wealth And Wisdom

Getting of Gold Does Not Require Exceptional Ability

"And where shall wisdom be found?" Mr. Julius Rosenwald, a man of great fortune, replies in a "moultone" that it is not in mere wealth. Most people, he says, believe that because a man has become wealthy, his views on any subject are valuable; but he holds that most large fortunes have been made by men of mediocre ability who "tumbled into a lucky opportunity." The friend of Joh who came to comfort him said that wisdom could not be "gotten for gold." Mr. Rosenwald's 20th century corollary is that getting of gold does not imply special wisdom in the getter.

Canadians Saving Money

At the end of 1928, savings deposits in the chartered banks of Canada stood at \$1,399,062,201, which represents a per capita deposit for the Dominion of about \$140.

First Wife—"How long had you known your husband before you were married?"

Second Ditto—"I didn't know him at all. I only thought I did."

Artists' Blunders

Many Statues and Paintings Very Glaring Errors To Observant People

Not one person in 10,000 probably, who passes every day the famous "Boudicca" statue on the Embankment, in London, England, has ever observed the gross blunder made by the sculptor. The group represents this early queen in a chariot drawn by fiery horses who are attached to the chariot by traces. But there were no such things as traces when the Queen of the Iceni went forth to battle.

In front of Westminster Hall, a few hundred yards away, is the statue of Oliver Cromwell. The Protector is in riding costume, but experts allege that he is wearing his spurs upside down.

Many other blunders of the same kind were indicated in a lecture given in London, England, by C. H. B. Quennell at the Royal Institute of British Architects.

There was the well known picture of the Pilgrim Fathers which contained an anachronism. The sailors were hoisting a Union Jack, which did not come into existence until 1801, a century and a half after the sturdy Pilgrims had left England.

Copley's famous canvas "Death of Chatham," in the National Gallery, led many to suppose that the great minister died in the House of Lords. He was in a very weak state when he went down to the House of Lords to make his great criticism of the Government's policy in the American War. He had a fit, but recovered, and did not die until five weeks later at Hayes. In Raphael's cartoon the "Miraculous Draught of Fishes," long at South Kensington, were fish never caught in the Sea of Galilee. No one had seen the skate there.

More Letters with Penny Postage

Penny postage, inaugurated at Christmas, is working well and bringing about a notable increase in letter mails from Canada to the British Isles, according to federal postal officials. It is estimated that the increase in the course of a year would be such as to offset the \$200,000 estimated reduction in revenue by the penny rate.

Fox Farming a Success

The Great West Silver Fox Farm, located about four miles from Princeton, B.C., made a shipment of 24 silver foxes to New Westminster the other day. There are now more than 100 foxes on the local farm, which is meeting with pronounced success in the commercial breeding of foxes.

Practical Results Are Obtained From Research Work Done In The British National Museums

Make Good Hay Crops

Tests Made With Oats and Barley Were Successful

Oats and barley, when the varieties are carefully selected, make very good hay crops. At the Rosyth, Saskatchewan, Experimental Station five varieties of oats and one of barley were tested and the results of the test have been published in the report of the station for 1927, published by the Department of Agriculture at Ottawa. The varieties of oats tested were Banner, Victory, Gerlach, Gold, Rain and Liberty. Each variety was cut at the time of heading out, then two weeks later, and again when turning. The crops cut at the turning period made a rich hay on account of the high percentage of kernel. The straw at this stage was also quite palatable. The crop cut at this stage also gave the highest yield of cured hay. Banner gave the best returns, though Victory, Gerlach and Gold Rain were also high. In the average of three cuttings, Gold Rain, Victory and Banner showed good returns and proved their suitability for annual hay purposes. In a three-year average of all cuttings Gerlach was the highest yielding, though the difference in its favor was only slight. Liberty, though a light yielder, produced the finest quality of hay. The barley used is known as feeder barley, an awnless variety, the straw of which remains green until the grain is nearly ripe. The yield from this was lower than from the oats but the hay from it is more palatable to live stock. In a three-year average the yield from the Gerlach, the highest, was two tons 804 pounds. The lowest yielding oats, Liberty gave almost 1 1/2 tons to the acre, while the hay from the feeder barley produced slightly over two tons from an acre of land.

Western Canada's Grain Elevators

According to federal figures there are now approximately 4,700 country grain elevators in western Canada, with a total capacity of about 150,000,000 bushels, as against 4,437 in 1927, with a capacity of 147,000,000 bushels. The storage capacity of the terminal elevators at Port Arthur and Fort William, at the head of the Great Lakes, was increased during 1928 from 73,000,000 bushels to 86,000,000 bushels.

The Natural History Museum, in South Kensington, the Science Museum in Exhibition Road, the Museum of Practical Geology in Jermyn Street, and the Royal Botanic Gardens, with the Herbarium and Museums at Kew, are four great scientific museums in the London area maintained solely or chiefly from public sources. Each has its visitors of the sightseeing kind. Each has its clientele of serious specialists, who visit the collections with a defined purpose, and who know something of the continuous research that lies behind the public exhibitions.

Those museums however, and their trained staffs have an immediate practical utility, on which much stress is laid in the Interim Report of the Royal Commission on National Museums and Galleries, because they are an invaluable and not sufficiently recognized agency in the development of industry and of industrial enterprise. A much larger part of the time of the staff than is generally understood is occupied not merely by curating and abstract research, but in studying and advising on problems of immediate practical moment.

Insects dispute man's lordship of the earth more seriously than any other living creatures by direct attacks on his food, his health, and his habitations. If an insect plague is to be fought the exact species must be identified as a first step towards distinguishing between harmful and harmless and towards finding out the weakest point in the life history against which measures may be taken with most chance of success. Advice is sought from the staff at the Natural History Museum. The whaling industry is recognized to be in grave peril from reckless exploitation. When it was decided to collect knowledge on a sufficiently broad basis for the devising of international protection and regulation the Natural History Museum was at once called on. The scientific staff of the Discovery expedition is now at work at the Museum examining the results of their inquiries in southern seas.

One example is sufficient to prove the practical advantage to the Empire and the world of the Royal Botanic Gardens at Kew. The cultivation of rubber and the industries dependent on it represent a value of hundreds of millions of pounds, and have become possible through the agency of Kew. In June, 1875, F. E. Wickham arrived at Kew with 70,000 seeds of the Brazil wild rubber tree, which he had been commissioned by the Indian Office to collect. These were sown in a space of 300 square feet. Some 2,500 germinated, and in August 1900, were sent to Ceylon in charge of a skilled gardener. About 1,700 reached Dr. Thwaites at the Peradeniya Botanic Gardens in excellent condition. The plants were established in Ceylon, and the plantations of Para rubber in India, Burma, Malaya, and elsewhere are the result.

At the Museum of Practical Geology the expert staff are constantly giving advice and information on ores and minerals of economic value and on gems and ornamental stones. The Science Museum is designed to illustrate and aid the application of science to all branches of industry, and these functions it performs by a magnificent library and by loan collections and apparatus.

A Sad Reminder

Mrs. Smith, just back from Europe, said to Mrs. Jones: "I just couldn't bear looking at the ruins in Italy. They made me so homesick for my husband." "Homesick for your husband?" "Yes, you know, Henry has fallen arches."

Your work would not be so humdrum if you put more hum into it.

"Is that number 99?" "No, it is number 66, but I turned the number upside down to the sake of a change."—Bonde alise-Sticks, Stockholm.

Collegiate Tours Enable Students to See Old World Attractions at Small Expense

DECK TENNIS DANCING ON DECK

The advent of Spring and early Summer will see thousands of care-free young men and women; college students, teachers, doctors, lawyers, artists and other professional folk packing their suitcases, bidding adieu to their friends, and boarding ocean liners for a voyage to Europe. Not so long ago trips of this kind were confined to a few fortunate folk with a good deal of money at their disposal, but nowadays the Collegiate Tours, organized by the Art Crafts Guild of Chicago in conjunction with the Canadian Pacific Steamships, has enabled young people and others of limited means to travel and see the world. In former times a superficial knowledge of

one's own country was considered sufficient for the ordinary person but in these days of intense competition it is acknowledged that some idea of other countries, particularly those of the Old World, is desirable both from the standpoint of an employer and from that of the person who would deem himself or herself really well informed.

These collegiate tours which leave several times a month from Montreal and Quebec, offer steamship accommodations varying from the increasingly popular and economical tourist third cabin to the regular cabin class. They are conducted by experienced people and offer varying itineraries including England, Holland, Belgium, France, Germany,

Switzerland, Italy and other countries. "Tourist Third" must not be confused with regular third class, for it is a recent innovation in overseas travel and provides good, clean, comfortable surroundings, an appetizing well-prepared menu, jovial and well-bred travelling companions and the run of a large part of a first-class liner at a very considerable reduction over the regular first cabin and cabin prices.

The St. Lawrence route to Europe is extremely picturesque and provides a river voyage of 1,000 miles before the open Atlantic is reached. Deck tennis, bridge parties, dancing on deck and other forms of entertainment speed the voyagers on their way.

Good

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

WORLD HAPPENINGS BRIEFLY TOLD.

A report that Russia and Japan had severed diplomatic relations was officially denied in Moscow.

Thirty-two named or numbered varieties and strains of spring wheat were tested at the Central Farm at Ottawa in 1927.

Captain Isaac Coffin, believed to have been the last survivor of the Crimean War, is dead, aged 93. He was born in St. John, N.B.

Production of automobiles in Canada during the calendar year 1925 reached a new record of 242,382 cars, having a sales value f.o.b. plant of \$151,826,338.

The U.S. House and Senate conferees on the deficiency appropriation failed to agree on the Senate amendment to provide \$21,000,000 for dry law enforcement.

James Melrose is dead at York, England, at the age of 100 years. He was refused a policy of an insurance company as a "bad risk" early in life. He was lord mayor of York, in 1896 and 1877.

Miller's Worm Powders will purge the stomach and intestines of worms so effectively and so easily and painlessly that the most delicate stomach will not feel any inconvenience from their action. They recommend themselves to mothers as a preparation that will restore strength and vigor to their children and protect them from the debilitating effects which result from the depredations of worms.

The only difference between the composition of the sugar on your table and the gasoline in your car is that the sugar contains a gas called oxygen which the gasoline does not.

What Will you do

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use; in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes fretful, or restless, Castoria was never more popular with mothers than it is today. Every druggist has it.

Fletcher's CASTORIA

W. N. U. 1772

Moved Large Tree

White Oak At Wellesley, Mass., Was Lowered Six Feet

An unusual feat of tree moving has been performed at Wellesley College, Wellesley. A large white oak observed the Christmas vacation by being lowered six feet. The cause of this descent was the necessary lowering of the hill on which the new dormitory, Stone Davis Hall, has been erected.

A large excavation was dug under the tree, which previously gave the appearance of being on a pedestal, and then powerful jets of water undermined the pedestal, and the tree dropped six feet to its new location.

Winnipeg Newspaper Union

Draped Slenderizing Silhouette

Distinctive smartness in charming new draped lines in one-piece dress that is partial to one-sidedness. The wrapped right front forms a dumpy skirt. The jabot frill of bodice is decidedly flattering in its soft rippling movement attached to right front in raver styling. The unique belt, attached at either side of front, holds in gathers on right side. To make this attractive dress for the 36-inch size takes but 3 1/2 yards of 40-inch material. Style No. 354 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. It is sketched in sheer woolen in soft green tones. Black wool jersey, purple canton-faille crepe, black crepe satin-printed rayon velvet in mauve-brown tones, and black sheer velvet are new Paris ideas, utterly chic. Pattern price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Sets Fractured Arm By Radio Instructions

Operator In Arctic Gets Medical Advice from Ottawa

Receiving medical instructions flashed 1,700 miles into the Arctic by wireless, and setting a fractured elbow is the accomplishment of G. Hudson, radio operator at Hope's Advance, in the Hudson Strait. The story is told in a series of cryptic messages between Hudson, at the range-finding station in the north, and the short-wave station of the Department of Marine at Ottawa.

Preceding his first message by "Rush Medical," Hudson said that H. H. Hall, a fur trader, suffering from an elbow injury, had succeeded in reaching Hope's Advance from Dinann Bay by dog sled. First aid had been supplied, and he asked that a diagnosis and instructions for treatment be rushed back.

Within 50 minutes F. Woodrow of the Trail Radio Station had obtained the required help from Dr. J. J. Hagarty of the Department of Health. In the lonely station in the north the operator succeeded in launching a confusion and setting the arm in splints. His latest messages indicated that his patient was progressing satisfactorily.

Does Not Always Require Intelligence

Astonishing Feats In Mathematics Accomplished by Ignorant Persons

The gift of computation does not, according to scientists, of necessity indicate a high order of intelligence. A famous example, writes "Engineering," is that of Tom Fuller, a Negro slave born in Virginia, who though he could neither read nor write, astonished 18th century investigators by his feats in mental arithmetic. Jacques Inaudi again, who could multiply four figures by four figures in his head as rapidly as a skilled operator could perform the feat with a machine, was merely an imperfectly educated peasant from Piedmont. He could also give the product of still larger numbers, but the advantage then lay with the machine. Some eminent mathematicians have, of course, also shone as computers, and Euler must have had marvellous powers of what Bidder called "registration," since he was able to pursue his mathematical researches after the loss of his sight.

To Prevent "Flu"

INFLUENZA GERMS FIRST ATTACK THE NOSE AND THROAT

Dangerous germs which lodge in the breathing give you Grippe, Flu, or Influenza. You can destroy these germs if you cleanse your nose, mouth and throat with Catarrhozone. When the healing vapor of Catarrhozone is inhaled it releases powerful antiseptics which destroy every vestige of germ life.

Protect yourself against "Flu" by using Catarrhozone; it stops a cold in a few moments, cleans the nostrils, takes soreness out of the throat. All the irritating matter in the nose and throat that smells so bad, that gives you a headache and makes you cough—Catarrhozone clears it all away.

For Influenza, Catarrh, Nose Colds, Irritable Throat, you will get prompt and effective action from Catarrhozone. Carry the inhaler in your purse or pocket, etc., use it frequently. Complete outfit \$1.00. Smaller size 50c. at all dealers.

Four million miles of flying were recently completed by the cross-channel fleet of the Imperial Airways. Since 1924, the company's planes carried more than 97,000 passengers and 3,000 tons of freight between London and the continent of Europe.

ECZEMA IN RASH ON HANDS

Troubled For Three Years. Healed by Cuticura.

"I was troubled with eczema on my hands for three years. It appeared in a rash and then formed blisters. It troubled me much worse in winter so I could hardly put my hands in water or be near heat. My hands were terribly inflamed and disfigured. I had to wear old gloves to keep from scratching."

"I saw a Cuticura Soap and Ointment advertisement and sent for a free sample. I got relief from it so I bought more and after I had used them for three months I was healed." (Signed) Miss Beatrice Aiken, Highwater, Que.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.

Sample each free by Mail. Address Canadian Depot: "The Canadian," Ltd., Montreal. Price, Soap 25c. Ointment 35c and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

THINNESS

Over-thinness is detrimental to a child's progress in growth and health.

Scott's Emulsion

of vitamin-rich cod-liver oil is a body-building food and tonic that overcomes thinness and helps build up a sturdy body.

Scott & Bowne, Toronto, Ont. 25-63

Preparing For Air Service

Aerodromes—Are To Be Built In South African Jungle

Jungle aerodromes are being laid out in Africa in preparation for the air service from Cairo to Johannesburg. Thousands of trees have had to be felled and their roots dug up to provide landing spaces. Ant-hills have been, in many places, removed by hand, as no other means were available. Some of them were over 25 feet in height. Experimental flights are to be made next summer as a preliminary to the regular service. The whole journey of 5,000 miles will take five or six days instead of two months by existing means of transport.

Mothers Warned Of Colds That Follow the Flu

Attack Weakened System and Pave Way for Pneumonia or New Case of Influenza

BEST TREATED EXTERNALLY

Physicians advise that the chief danger in this epidemic is after influenza. Then, more than ever, cold attacking the weakened system may lead to bronchitis, pneumonia, or a second and more severe case of flu. This is especially true of children.

Flu nearly always leaves the stomach upset. Internal medication should, therefore, be avoided, as it so often further disturbs the digestion and thus retards recovery.

But if a fresh cold comes, don't let the child keep it overnight. Just rub Vicks on throat and chest at bedtime. As it is applied externally, Vicks can be used freely even on the youngest child, with no fear of upsetting a delicate stomach.

Vicks acts two ways at once (both absorbed and inhaled) to check the cold and avoid serious complications. And, of course, it is just as good for adults.

Four European Tours

C.N.R. Complete Arrangements For Personally Conducted Trips This Summer

Pennies are being saved, and history and French are being brushed up by scores of Western Canadians who are looking forward to a tour of Europe this coming summer. Early as it is in the season, the Canadian National Railways have already announced the completion of arrangements for their four annual personally conducted European tours. The Cunarder, "Andania," will leave Montreal on July 5, and from the word "Go!" it will be high holiday for the school-teachers and other lucky ones who are on board.

Motor jaunts through England and Scotland will take inn places names make the imagination quiver—Melrose Abbey, Holyrood, Abbotsford, Warwick Kenilworth, Stratford-on-Avon, Oxford, Hampton Court, Stoke Poges—there will be a steamer trip on Loch Lomond, a visit to the Trossachs, and days in Glasgow, Edinburgh and London. Then there will be a long stay in Paris and a journey to Versailles and to the battlefields.

Those who stay in Europe longer will visit Brussels, and Cologne, and Switzerland, and the travellers with even greater leisure will have the joy of going down into Italy—Milan, Venice, Florence, Rome, Genoa—and to Nice and Monte Carlo.

The first return steamer, the "Andania," will depart from Southampton on August 3; the second, the "Auisania," from Cherbourg, on August 10; and the third, the "Alania," from Cherbourg, on August 24.

The Many-Purpose Oil. — Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

Transforming Palestine. A powerhouse is being erected on the River Jordan a few miles below the Sea of Galilee. The river drops 3,000 feet in 104 miles. Automobiles, electric lighting and steam railway trains are working a transformation in Palestine.

SUNDAY SCHOOL LESSON

FEBRUARY 17

PRAYER

Golden Text: "If ye abide in Me, and My words abide in you, ask whatsoever ye will, and it shall be done unto you."—John 15:7.

Lesson: Genesis 18:23-33; Exodus 32:21, 32; Nehemiah 1:4-11; Daniel 6:10; Matthew 6:5-15; Luke 18:1-14; John 17:1-20; 1 Thessalonians 5:17; 1 John 5:14, 15.

Devotional Reading: Psalm 121:1-8.

Explanations and Comments

Prayer Should Be Sincere, Mt. 6: 5-8.—And when ye pray, ye shall not be as the hypocrites; for they love to stand and pray in the synagogues and in the corners of the streets, that they may be seen of men. It was the appearance of righteousness that the hypocrites coveted, not the righteousness itself.

"To be seen of men is, after all, one of the most influential incentives to human conduct. Some people go into reckless extravagance in order to be seen of men as rich, and the average person would rather be seen to have certain qualities than actually to possess them."—H. S. Brewster.

"Verily I say unto you, 'They have received their reward,' said Jesus in regard to the hypocrites. The Greek word translated 'received' means 'received in full,' and is the one used in drawing up receipts. They have received the full reward which they sought, they have been seen of men, and this was what they desired; they have no claim whatsoever to any further reward.

"Nor will he to those lips attend, Whose prayers are not sincere."—John Buxton.

But thou, when thou prayest, enter into thine inner chamber, and having shut thy door, pray to thy Father, who is in secret. The inner chamber with closed door stands for any place where we are alone with God. For Nathaniel it was under the fig tree, for Peter, it was on the housetop. Jesus himself chose the mountain-side, and the garden for His communing with His Father. When you pray shut out the world and shut yourself in with God. "Dew falls, we are told, only when the atmosphere is still, and the dew of prayers will fall abundantly on our souls only when we are at leisure." Jesus is not disparaging public prayer (which He elsewhere commends), but He is emphasizing the test of sincerity which private prayer affords.

And thy Father who seeth in secret shall recompense thee. General William Booth started the Salvation Army standing on a soap box outside a saloon in the East End of London.

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Electric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

Business Was Good

Four million miles of flying were recently completed by the cross channel fleet of the Imperial Airways. Since 1924 the company's planes carried more than 97,000 passengers and 3,000 tons of freight between London and the continent of Europe.

Once when mother spoke of reducing she meant expenses.

COUGHS & COLDS
are often the forerunners of serious complications, trouble and expense. Don't allow your horses to be laid up when you need them most. Keep them working with **SPOHN'S** Horsemen's Cough Syrup. Livestock Industry Prosperous
The livestock industry of Alberta was responsible for a revenue of \$8,775,257 in 1925, according to D. A. McKenzie, Dominion markets representative. The livestock industry is enjoying a measure of prosperity which should encourage those engaged in this branch of agriculture to face the future with confidence, he stated.

FOR MOTHERS OF YOUNG CHILDREN

Mothers are quick to praise anything which brings health and comfort to their little ones—any medicine that will make the baby well and keep him well will always receive hearty recommendation from the mother. That is why Baby's Own Tablets are so popular. Thousands of mothers throughout the country, not only use them for their own little ones but are always delighted to be able to recommend them to other mothers. Thousands of mothers have proved Baby's Own Tablets to be without an equal in relieving their little ones of any of the many minor ailments which arise out of a derangement of the stomach and bowels. Baby's Own Tablets are the ideal laxative—easy to take but thorough in action. They banish constipation and indigestion; break up colds and simple fevers; expel worms and make the teething period easy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Edna: "Chivalry is dead. Can you imagine a man today like Sir Walter Raleigh spreading his coat for a woman to cross a mud-puddle?"
Crawford: "He wouldn't have to. She'd jump it!"

Branch Line Program Has Been Announced By Canadian National

Montreal.—The Canadian National Railways propose to build during the next three years branch lines having a total mileage of 695 miles, the largest portion being in the wheat-growing area of the west. Details of the new program, which has been under discussion at the system headquarters for a considerable time past, have become known, and the proposals after being submitted to the board of directors, will be immediately laid before Hon. C. A. Dunning, minister of railways and canals at Ottawa, for parliamentary sanction this session.

A series of conferences have been taking place between the officers of the Canadian National and the Canadian Pacific Railways, with a view to arriving at agreements regarding certain lines in territories where the plans of the two companies appear to conflict.

While no official announcement has been made concerning these conferences, it is understood agreements have been arrived at covering several of the questions which threatened to bring about railway duplication.

The lines proposed by the Canadian National Railways fall into two general classes: lines which afford economic and operating advantages to the system, and branches for the purpose of general development and colonization of the country which will constitute feeders to the system.

Just Three Minutes Late

Lindbergh Ends Inaugural Flight Practically On Schedule Time

Cristobal, Canal Zone.—Col. Chas. A. Lindbergh brought the air mail to Cristobal approximately 1,700 miles from his starting point just three minutes late.

Lindbergh landed his two motored amphibian plane here from David, Panama, ending his three-day inaugural flight over the Panama Airways mail and passenger route from Miami, Fla., to Cristobal.

U.S. Auto Crashes Costly

Loss Of 27,000 Lives and \$850,000,000 During Last Year

Chicago, Ills.—Eight hundred thousand automobile accidents in the United States during 1928 cost 27,000 lives and involved an economic loss of \$850,000,000, the National Safety Council reports.

Although the fatalities represent a five per cent. increase over 1927, it is the lowest increase for any one year since 1920.

Commission Now In Europe

London, England.—The Canadian broadcasting commission under the chairmanship of Sir John Aird, president of the Canadian Bank of Commerce, left for the continent February 7. It is understood the members have been favorably impressed by the British organization which yields a revenue of about \$5,000,000 yearly under government supervision, divided between the government and the corporation.

Married In California

Los Angeles.—Sir Rodmond T. Roblin, Canadian financier and former premier of Manitoba, and Miss Ethel M. Leggett, of Los Angeles were married at the Wiltshire Congregational church here, February 5. More than 100 guests attended the ceremony which was extremely simple.

Officials Confer On Townsite Plans For Port Of Churchill

Winnipeg, Man.—Townsite plans for the Port of Churchill on Hudson Bay, it is understood were considered when Col. A. E. Duhuc, D.S.O., chief engineer of the department of railways and canals, Ottawa, met Hon. D. C. McKenzie, provincial secretary and minister of mines and natural resources, here.

Colonel Duhuc arrived on what he said was a rush trip to the city and shortly afterward was joined at the Fort Garry Hotel by Mr. McKenzie. Neither Colonel Duhuc nor Mr. McKenzie would state what their purpose was, but it was authoritatively

Better Relations Looked For

Balkan States Making Arrangements To Open Frontier

Sofia, Bulgaria.—After years of extreme tension and recurring frontier disputes, Bulgaria and Yugoslavia seem at last on the threshold of better relations.

The frontier, which has been closed for a year and a half, a situation which gave rise to bitter feelings in Bulgaria, is to be opened. Word of this was brought to M. Droff, foreign minister here. A mixed commission will meet at Sofia to draw up details of the frontier agreement.

A formal commercial treaty between the two governments is expected soon to better trade relations.

Alberta Keeps Own Police

Province Prefers Not To Make Change In System

Edmonton.—The Alberta Government will not accept the offer of the Dominion Government, that the Royal Canadian Mounted Police shall take over the policing of this province from the existing Alberta provincial police force.

This much was made evident by Premier Brownlee in the legislature, and he gave as his reason the same reason that the Federal Government gave when they refused to remove the R.C.M.P. from the province—that they intended to have their own statutes enforced by their own police.

B.C. Beekeepers May Have To Register

Amendment To Apiaries Act Will Be Introduced Shortly

Victoria, B.C.—In order to guard against the menace of foul broods, all beekeepers in British Columbia will be required to register with the Department of Agriculture under an amendment to the Apiaries Act which Hon. Wm. Atkinson, Minister of Agriculture, will introduce in the legislature shortly. No fee will be charged for registration, which in the opinion of the government is necessary so that the operations of the apiaries may be kept under close review.

Ottawa Athlete Killed

Plane Crashed During Solo Flight At Camp Borden

Ottawa.—J. G. "Jerry" Ault, prominent athlete of this city, died as the result of injuries sustained at Camp Borden when the plane he was flying crashed. Mr. Ault, who was training for a pilot's certificate, was on a solo flight when his machine went into a tail spin.

A court of inquiry will be held at Camp Borden to determine the cause of the accident.

Entered In Dog Derby

Quebec, Que.—Emile St. Goddard, of The Pas, Man., well known Canadian dog driver, is again entered in the 120-mile annual eastern International Dog Derby, which event is to be run off here on February 21, 22 and 23.

B.C. Cars Show Increase

Vancouver, B.C.—Distribution of automobiles in the population of British Columbia, according to figures based on car licenses issued, is ten to every 68 persons. At the end of 1927 it was ten for every 75 persons.

Seeking Right To Control Property

Shareholders Of Grand Trunk Railroad Lodge Petition With Government

Ottawa, Ont.—The shareholders of the Grand Trunk Railroad are seeking the recovery of their right to control the railway property, now an integral part of the National Railway system, or fair compensation for their shares.

To this end they have lodged a petition of right with the government at Ottawa, claiming a fiat to sue the Dominion of Canada for the restoration of their property.

The par value of the shares held by the shareholders amounts to about \$180,000,000, and presumably the alternatives before the government, if the law suit was successful, would be either to pay these shareholders \$180,000,000 or to surrender the Grand Trunk lines.

At the moment none of the ministers or deputy ministers concerned in this matter will discuss it.

To Protect Gold Reserve

Bank Of England Raises Rate One Per Cent

London.—Directors of the Bank of England raised the bank rate 1 per cent., lifting it to 5½ per cent. from the 4½ per cent. level at which it had rested since April 21, 1927.

The necessity for some measure to protect the bank's gold reserve from inroads through shipments to the United States had long been recognized in the money market, but it had been hoped that a working agreement between the central institution here and that in the U.S. would have devised some measure of assistance before this.

The net outgo of gold from the Bank of England in one week was more than \$3,000,000, reducing the bank's stock to less than \$150,000,000, and the higher rate was imposed in an endeavor to raise the sterling rate of exchange and to check the outflow of gold.

Radio For Peace River

Premier Brownlee Outlines Year's Plans For North Country

Edmonton, Alta.—Short-wave radio stations to link up isolated points in Alberta's north, pending the carrying of telegraph communication to such points; an intensive search for water in areas where water is scarce; three survey parties on soil surveys, and a survey party to examine the pre-Cambrian Shield in the northeast of the province for mineral possibilities, are among plans for the Peace River country this year, Premier Brownlee told the Alberta legislature.

Liquor Billed As Asbestos

Winnipeg, Man.—A carload of liquor, valued at approximately \$60,000, was seized by a combined squad of city police and provincial enforcement officers in St. Boniface. The liquor was billed as asbestos, the bill of lading showing that the shipment had been made by the Canadian Asbestos Company, Ltd., of Cote St. Paul, Montreal, to the Winnipeg Roofing Company.

Increase In Jersey Cattle

Toronto.—At the annual meeting of the Canadian Jersey Cattle Club held here reports of registration and transfers showed a marked jump, the figures for 1928 being 24,070, compared with 15,480 in 1927. J. W. McGillivray, Chilliwack, B.C., was elected a vice-president.

FORMS FINANCIAL BUSINESS

C. Rice-Jones, who, until recently, was vice-president of United Grain Growers, has gone into the financial business in Western Canada, and has established his own company, C. Rice-Jones and Co., Limited. To devote himself to this business he has resigned from the Vice-Presidency and from the Board of United Grain Growers, thus severing a connection which has continued during many years.

Prior to 1917, he was President and General Manager of the Alberta Farmers' Co-operative Elevator Company. He helped to bring about the amalgamation of that Company with the Grain Growers Grain Company to form United Grain Growers' Limited, and since 1917 has been first vice-president of the amalgamated company.

He has many friends in all the Western Provinces, and in addition is well known in financial centres. Mr. Rice-Jones has established connections with financial houses in Toronto, Montreal and New York, and is completing an organization of representatives in western towns and cities.

C. Rice-Jones and Co., Limited will be located in the Curry Block, Winnipeg, where a general investment service will be given on stocks and bonds, and, in addition, the company will participate in the underwriting of new issues of securities.

Injuries Proved Fatal

Workman For Paper Company Caught In Gear Of Machine

North Bay, Ont.—Despite the effort of a gang of men armed with acetylene torches who cut through gears and shafts of a huge bleaching machine to release him, and the chartering of a special train to rush him to hospital, William Ashcroft, an employee of the International Paper Company, died from shock and loss of blood.

Ashcroft's leg was caught in the gear of the big machine, and, owing to the nature of the mechanism, the gears could not be reversed. The torches were immediately employed and the machine literally cut to pieces. A special train rushed him to hospital in Mattawa, where his right leg was amputated. The shock proved too severe and he died a few hours later.

Succeeds Late Major Bell

Ottawa.—The appointment of R. A. C. Henry, director of the bureau of economics of the Canadian National Railways, to be deputy minister of railways, succeeding the late Major Graham A. Bell, has been announced by the prime minister. Mr. Henry takes up his departmental duties with the same salary as his predecessor—\$10,000 per annum.

Government Dealing With Question Of Return Of Natural Resources

Nurses Called To Paris From England

Fin Epidemic Has Reached Serious Proportions In France

Paris.—France's influenza epidemic has become so serious that it has been found necessary to import nurses from England.

This procedure ordinarily would be attended with endless red tape, but much of this has been dispensed with in the present instance to facilitate treatment of cases in Paris hospitals. In some cases doctors have been able to get needed assistance by telephone within twelve hours from London.

One hospital authority estimated that about one-fifth of the Parisian population were affected.

Thus far most of the cases have been mild, but later reports show there has been an increase in pneumonia and bronchial symptoms following influenza. There has been a corresponding increase in the death rate.

Wants Airplane For Alberta Police

Commissioner Also Suggests Broadcasting Radio Station At Headquarters

Edmonton.—Commissioner W. C. Bryan, of the Alberta Provincial Police, in his annual report, made public by Hon. J. F. Lymburn, attorney-general, favors the proposed purchase of an aeroplane to be manned by men of the force with flying experience in the great war, and to be used for emergency purposes. He also recommends strongly establishment of broadcasting radio station at headquarters for the more expeditious information of detachments regarding crimes and other urgent information.

Gain In Ship Production

Great Britain and Ireland Lead Lists In Total Tonnage

New York.—Lloyd's register of shipping has announced that an increase of nearly 20 per cent. in the world's production of merchant vessels was established in 1928.

Great Britain and Ireland, which lead the lists in total tonnage had the largest percentage and all maritime countries except the United States shared in a 400,000 gross tons increase over 1927.

Mercantile tonnage launched in the United States was only slightly more than half the 179,218 tons aggregate for 1927, but Great Britain and Ireland gained 18 per cent. and all other countries combined 32 per cent.

Receives Jail Sentence

Belfast.—Eamon de Valera was sentenced to a month's imprisonment for attempting to enter Northern Ireland in contravention of an order of seven years' standing.

Ottawa.—The documents tabled in the House of Commons by the Prime Minister in response to a request by Hon. R. B. Bennett, leader of the opposition, dealing with the question of the return of the natural resources to the prairie provinces, disclosed that with respect to Manitoba the solution hinges upon the decision of the commission which is now investigating the financial and other considerations relative thereto.

Subject to agreement by the two governments, concerned upon the findings of the commission, legislation will be introduced into both federal and provincial houses to give effect to whatever recommendations are acquiesced in.

With regard to Saskatchewan, Premier James G. Gardiner and members of his cabinet will meet the federal government here on Tuesday, February 19. This has been arranged in response to a communication from Premier Gardiner.

"The object of our delegation will be to have the maligned resources turned over to the province and also to discuss the terms under which the transfer will be mutually acceptable," Premier Gardiner's communication reads.

The offer of the federal government to the province of Alberta which was made in December last year, following the conference with Premier J. E. Brownlee in Ottawa, is set forth at length and is declared by the Prime Minister to be "not subject to further modification by correspondence."

Not Pleased With Offer

Premier Brownlee Comments On Terms For Transfer Of Natural Resources

Edmonton.—That the Alberta Government isn't too well satisfied with the terms offered by the Dominion Government for the transfer of the natural resources, was indicated by Premier Brownlee in the Legislature in the course of his speech in the throne speech debate.

"The financial offer made to this province is, I am convinced, the very minimum that the Federal Government feels it can offer to the provinces of Manitoba and Saskatchewan with any reasonable hope of acceptance," Mr. Brownlee stated.

Figures Show England Going Dry

London, England.—Of its own accord England is going dry. At least, if the consumption of spirits declines in the future as it has in the past 28 years. In 1900, the consumption of spirits in England was 32,239,522 gallons. Last year's figure is but 10,412,921. Other means of recreation, such as the movies, radio, etc., are given as the reason for this decrease.

Approves Chinese Treaty

Washington.—Approval was given by the senate foreign relations to the treaty granting tariff autonomy to China.

No Extensive New Legislation Indicated By Speech From Throne

Ottawa, Ont.—The speech from the throne with which His Excellency the Governor-General opened Parliament, consists largely of a review of the activities and accomplishments of the Government since the close of the last parliamentary session.

New legislation announced is not extensive. Amendments to the Dominion Elections Act, to the Companies Act, the Fisheries Act, the Narcotic Drug Act, and the act respecting technical education are pieces of new legislation to be forecast.

The speech also states that Parliament will be given an opportunity to approve the multilateral treaty for the renunciation of war, as well as the treaty providing for preservation of the scenic beauties of Niagara. Amendments to the Railway Act, which will grant to the railway commission powers of investigation of affairs in relation to subsidiary concerns and with respect to the issue of capital stock will be introduced.

One of the most important announcements connected with the speech is that legislation to provide for a general pensions scheme for the benefit of Canadian National employees will be brought down.

The speech expresses thankfulness for the recovery of His Majesty, refers to the "unprecedented prosperity" of the Dominion, draws particular attention to the development of the mining industry, and suggests further legislation to implement recommendations of the Fisheries Commission. It states that plans are in progress for construction of the national research laboratories.

Reference is made to immigration agreements which have been concluded. Announcement of the introduction of a further branch line program by the Canadian National Railways is also contained in the speech, and it is estimated that authority will be asked for the acquisition of certain railways in both Eastern and Western Canada as feeders of the government-owned system.

W. N. U. 1772

To Trap the World's Melodies!

The world will soon have another symphony! Rudolph Friml, the noted composer of Rose Marie, The Vagabond King and other musical successes, is circling the globe in search of inspiration for a new work. With his folding baby-sitter, he joined the Empress of Australia at Monaco, and will make the world cruise on her, searching India, the Orient and other points in the mystic east, for new and haunting melodies which will later be sung and hummed and whistled the width and length of the globe.

J. W. EVANS, Auditor.

Raymond, Alberta.

Dated at Raymond this 31st. of January, 1929.

Mr. Ratepayer.

Dear Sir:

The Department of Agriculture is spending a good deal of money on Weed Eradication, and they desire the co-operation of every ratepayer in this important work.

You are paying taxes to support this work and we should like to see you at the Annual Meeting where a full discussion of the whole subject may be had.

If we wish to make progress against the weed menace we must all take an active interest.

Yours very truly,

O. H. SNOW.

Secy.-Treas.

Notice of Municipal Meeting and Nominations of Candidates at a Divisional Election

Notice is hereby given that a meeting of the electors of the Municipal District of Sugar City No. 37, will be held at the Raymond Second Ward Chapel at 1 o'clock p. m. on Saturday the 23rd. day of February, for the discussion of the affairs of the district, and that from 3 to 4 o'clock p. m. on the same day and at the same place, nominations for the office of Councillors for Divisions:—No. 1 New Dayton, No. 2 South Raymond, and No. 4 Wellington, will be received, being three Councillors to be elected.

W. G. MEEKS, Returning Officer.

BETTER SEED

With the rapidly increasing acreage of land which is being seeded to grain through out the western Provinces each year there is a growing need and demand for high quality seed grain.

It is highly important from the standpoint of the farmer, the western provinces and the grain trade as a whole, that all land and especially our new land, that is devoted to grain clean high quality seed that is true to variety.

The average farmer realizes the importance of good seed: in helping to control weeds, increasing yields, insuring uniform germination and ripening and reducing the cost of production etc. He is also aware of the negative possibilities of poor seed. But in spite of the foregoing it is generally admitted that there is entirely too great a percentage of our land seeded to foul and low grade seed as has been conclusively shown by recent investigation by our Dominion Seed Branch.

One of the causes for the use of inferior seed can be traced to the lack of efficient seed grain cleaning equipment on the farm. With the average farmer the cleaning of seed is a laborious task necessitating the handling and rehandling of considerable quantities of grain. Furthermore, his cleaning equipment which represents a considerable investment when compared with the actual work work performed is quite often in a state of disrepair and thus produces very unsatisfactory results. Under such conditions the farmer very often decides to take a chance with seed

which he knows is not up to his own standards of excellence.

It would appear that an economy of money, time, and effort, as well as an improvement in the quality of seed could be effected by consolidating the seed cleaning plant provided with modern equipment and under experienced management.

If such a local plant were located centrally with railway facilities, and provided with equipment for the cleaning of such kinds of farm seed as would meet local requirements, there would be little excuse for farmers using poor seed. It would provide an incentive to farmers to use and grow clean seed, registered or commercial, and also aid in placing the same upon the market in a satisfactory condition.

It might also be pointed out that such a plant could conveniently provide for the treating of wheat for smut with copper carbonate, a method which is rapidly superseding the formalin treatment. Such a means of smut treatment should be decidedly more efficient, cheaper, and less hazardous than would be the case if done on the farm.

Such local cleaning plants are now in operation in the province. They have been well patronized by the farmers. At the Lacombe Experimental Station where one is in operation it is estimated that last year 10,000 bushels of seed were cleaned, such a service must undoubtedly be a benefit to the Lacombe district.

TO FORM COARSE GRAINS POOL

Announcement is made from the head office of the Alberta Wheat Pool in Calgary that the directors of the organization have definitely decided to proceed with the formation of Coarse Grains Pool and that this will be in operation in time to handle the 1929 crop. This development it is stated, will not necessitate any new selling organization as the coarse grains will be handled through the central selling agency of the Pool.

It is pointed out that only members of the Wheat Pool will be eligible to participate in the Coarse Grains organization. While no definite statement is made, it is probable that oats and barley will be handled for pool members under the new arrangement.

When 2 cents per bushel farm storage payment came into effect on January 16th, the receipts at Alberta Pool elevators almost doubled for a considerable period. 200,000 bushels a day were received for some considerable time.

Scores of meetings have been held by Alberta Wheat Pool field men throughout the province, every phase of the Pool movement is open for discussion at these meetings.

J. A. Clayton, Utah Idaho Sugar Company auditor, is here auditing the books at the local plant. He is assisted by Mr. Dalton of the Chinook factory staff.

THRESHERS REQUIRED TO FURNISH RETURNS.

The Minister of Agriculture desires to draw the attention of threshermen throughout the province to the conditions under which threshing permits are issued by the department. Each registered machine owner is required to make a return to the department of agriculture showing the number of acres and the number of bushels threshed during the season. Up to the present time a considerable number of threshermen have not complied with this regulation and it is pointed out that complete returns of this kind provide the basis upon which a definite statement can be issued showing the total and average yield of the various grains produced each year in the province. In the absence of this definite information the Department is in the position of having to accept estimated figures compiled in other ways. For this reason it has been found necessary to accept the estimated figures for the present year's grain yields compiled and issued by the Dominion Bureau of Statistics. An appeal therefore is made to threshermen and farmers throughout the province to co-operate with the department in making available the fullest possible information which will be of assistance in this connection.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

CHAPTER XIV.—Continued.

"To hell mit him!" shouted Hand. "He don't dare do it. Rush him." But the mob did not obey their leader's rash command. Donald's pale face and burning black eyes were sufficient evidence that he made no idle threat. Donald saw the big hand of his foreman stealing to the butt of the heavy Colt that hung at his side. "Keep cool, Jack," he begged; "don't start anything."

For days Gillis had been without sleep. He turned bloodshot eyes on Donald. "By G—! I would like to take a crack at Hand," he said in a voice thick with rage.

The hostile crowd did not advance; neither did they leave. Scattered in groups, they lay or sat on the hillside to shout occasionally words of derision at Donald's faithful crew.

Donald's nerves were on edge. At any moment there might be a pitched battle with loss of lives. He studied the faces of the strikers to see how many were from his crew and was surprised to recognize fully 40 of his men. He saw "Blackie" in the rear of the crowd of strikers. When his eyes met Donald's he turned away shamefacedly. All the men from his camp refused to meet his gaze squarely. "Those men are ready to come back right now," he said to Gillis. "Hand has bullied them into this. Don't you think so?"

"I don't know," answered Gillis. "I never thought Blackie would go back on me. I'll wring his d—d neck when I catch him in town!" he added bitterly.

Donald heard a slight movement behind him, and turned to see Connie standing with her rifle in the crook of her arm.

"Good heavens! Connie, you shouldn't be here!" he exclaimed.

Connie's face bore traces of weariness and sleeplessness. For three nights she had stolen softly away from her cabin on the hillside to the hidden outside that of Donald. By night she had kept up a weary vigil, ever on the alert; in the forenoon she had lain behind a stump on the hill with eyes on Donald's tall figure whenever he came in sight, her rifle ready for instant action. Hand did not know that death had nearly claimed him when he stepped forward to urge his men to charge. At that critical moment Connie's rifle was aimed at his heart.

"Get away from here at once, Connie!" said Donald, firmly, but kindly.

Connie lowered her eyes to her moccasined foot, that was weaving

patterns in the dry soil, and shook her small head obstinately.

"Why do you wish to stay?" he asked.

She patted the stock of her rifle. "I—I want to help you."

Donald looked down at the weary little figure. He stepped down from the stump, keeping a wary eye on the belligerent strikers, and came to her side. "Connie," he said softly, "you are a dear, brave little girl, but you must get away from this place as there may be serious trouble. Please, Connie," he entreated, reaching out a hand to stroke her shining hair.

Connie's face paled quickly, and she shrank from the caress. Her slender body trembled at his touch, and his display of tenderness brought a sudden rush of tears to her eyes. But she made no move to leave the scene.

Finding that he could not shake Connie's determination to stay, Donald returned to the vantage point of the stump. "Jack," he said, turning to his big foreman, "I am going to make one last appeal to these men. If I am any judge of human nature about half of them, if they can save their faces, will welcome the chance to go back to work. They are being dominated by Hand."

Gillis shrugged his shoulders. "Do what you think best," he said. Donald passed the dynamite to Gillis and stepped forward with his arms extended, palms upward. The crowd moved uneasily. Hand came slowly to his feet, his small eyes narrowed with suspicion.

"What's up?" he growled.

"Men," Donald began in a high clear voice, "I would like to convince you that you will gain nothing by your present tactics. Bloodshed will surely ensue. I have orders to refuse your exorbitant demands. Personally, I have no choice in the matter; there is no other course for me to pursue. In spite of your interference we will continue working with the few men who have remained loyal. I will ask for police protection only as a last resort. I appeal particularly to the men who worked for me here at this camp. Is there one of you who can truthfully say that you were not accorded fair treatment? Is there one of you who will not admit that the general equipment for your comfort is unequalled in any camp in British Columbia? You are making a mistake, men," he went on in a pleading tone, "a mistake you will be sorry for later, for you will be blacklisted in every camp in the country. Go back to work, and I promise you there will be no mark against you. That's all."

Donald walked back to Connie's side. The men had not interrupted him once.

Hand turned to the wavering crowd. "To hell mit him and all capitalists!" he snarled. He turned to shake a huge fist at Donald. "You threaten us, do you? You d—d!"

The epithet that came from his

coarse lips was one that would cause any decent man to see red.

Donald stiffened. His face turned livid. "You dirty cur!" he flamed. "Don't you know that there is a lady present? You apologize to this little girl or I will whip you within an inch of your life!" His voice trembled with passion.

"Lady," scoffed Hand, "vat you call a lady? She moost be nlec lady, runnin' in de woods wit' you ev'ry Sunday."

A murderous look shot from Donald's dark eyes. A terrible rage possessed him, a rage that made his blood feel hot in his veins and gave him the unnatural strength of a madman. A dull red flamed in Connie's tanned cheeks. She sat down and covered her hot face with her hands.

Andy now came running from the cook-house, dressed in white cap and apron, his rifle trailing at his side. "What's goin' on, Donnie?" he questioned.

Donald did not answer. Gillis spoke to Andy in an undertone.

"My God, Donnie, 'e's twice your size! Don't fight 'im!" implored Andy.

"I'll kill him!" rasped Donald.

Gillis seized his arm. "Let me fix the d—d skunk; he's nearer my size."

"No, this is my affair!" shaking himself from the grasp.

The sound of a paddle came from below, and the trapper sprang from his dugout and came swiftly up the hill. As Andy briefly explained the situation the old man's grey eyes narrowed to mere slits beneath the shaggy brows.

"Ah!" he breathed. "Me and 'Betsey,' patting his six-shooter, 'we likes to shoot up bohunks. We shoots them in the heel so's to save their clothes.' His mouth was set in a grim smile, a smile that was belied by the steel look in his deep-set eyes. He seated himself on a log and placed his gun on his knees.

Donald had by this divested himself of coat and shirt and now stepped forward dressed in light cotton trousers, a sleeveless undershirt and moccasins. "Hand," he said in a steady voice, "this is between you and me. See to it that your men do not interfere; I will vouch for mine."

The big foreman was rubbing his big hands as though in pleased anticipation. "I suppose you know how we lss goin' to fight? Everything goes, you know." His grin was fiendish.

Donald knew what was meant. There were to be no rules of combat; no time duration; no referee; no rounds, and woe to the man who should go down. It was to be a battle as of primeval man. It might result in terrible injury and mutilation. He shivered at the thought.

(To Be Continued.)

Help Would Be Welcome

Prosperity Enjoyed in Canada Should Make People Generous

The British government, staggering under a burden of taxation never before borne by any other nation in modern history, has done all that was humanly possible in the way of providing state safeguards against the conditions which now prevail. Yet stark poverty stalks through the land, and semi-starvation and exposure have combined to make an attack on a people which a disease epidemic would change into a tragedy that would stir the entire English-speaking world. Circumstances beyond the control of the stricken people are responsible for their adversity; circumstances largely beyond our own control have made Canadians so prosperous as to be able to extend a helping hand—at once. —Toronto Globe.

How He Understood It

One day, in the third grade reading class, the teacher was telling a story of a dog and a fox. When she came near the end of the story she said, "And the cunning fox jumped up on the stone wall and ran along it, and the dog lost his scent."

When she finished the story she called on the little Italian boy in the class to repeat the story. — Joe stared all right, but as he came to the end of the story he said, "An' de cunning fox, he jump up on de stone wall an' run along it, an' de dog, he lose his penny!"

Largest in World

The Canadian Governmental Experimental Farm system now embraces twenty-seven farms, seven substations, one horse-breeding station, one fox ranch, ten plant pathological laboratories, and 201 illustration stations at different points in the nine Provinces of the Dominion. The system is the largest of its kind in the world.

Christie's ARROWROOT

Recipes for This Week

(By Betty Barclay)

GRAPE MOLD

5 tablespoons quick-cooking tapioca.
1/2 teaspoon salt.
1 pint hot grape juice.
1/2 cup sugar.
1 cup shredded pineapple.
1 cup quartered marshmallows (if desired).
2 egg whites.
Lady fingers or strips of sponge cake.

Cook tapioca and salt in the hot grape juice in a double boiler 15 minutes, stirring frequently. Stir in sugar. Remove from fire and add pineapple. When partially cooked, stir in the marshmallows (if desired), and fold in the stiffly beaten egg whites. Arrange split lady fingers around sides of a glass bowl or around individual sherbet glasses. Pour in mixture and chill. Serve with whipped cream. Lady fingers or sponge cake may be omitted.

MACARONI WITH OYSTERS OR FISH

6 ounces macaroni.
1/2 teaspoonful salt.
1-2 teaspoonful pepper.
2 tablespoons butter or a substitute.
1 pint oysters.

Cook the macaroni until tender in boiling salted water, drain, then season with the salt, pepper and butter. Oil a baking dish and put a layer of the macaroni into it, then a layer of oysters which have been carefully picked over, more macaroni, more oysters, and so on until the dish is full. Pour the liquor from the oysters over the top—there should be a cupful of this liquor—if there is not enough make up the deficiency with milk. Bake twenty minutes in a moderate oven—350 degrees F.—and serve with tomato catsup.

Cold left-over fish may be substituted for the oysters if desired, using left-over sauce or milk for the moistening in place of the oyster liquor.

The Carnival Of Noise

Much of It Is Unnecessary and Could Be Eliminated

The present high peak of street noises has been reached so gradually that many persons have not fully appreciated what they are allowing others to inflict upon them and have not stopped to consider whether, in fact, the various components that make up the existing pandemonium are really necessary and unavoidable. Each new addition has been accepted with astonishing complacency. The unsilenced motorcycle, the klaxon, the heavy lorry, the airplane, the steam tractor and the pneumatic drill, have been tolerated in turn. Each of these noisy inventions has been turned loose without let or hindrance and people have ceased to marvel at them or to wonder what diabolical invention engineering science will thrust upon them next.

Sore Corns Drop Off If You USE "Putnam's"

When you notice any sign of callous on the feet or toes—that's the time to paint on a few drops of PUTNAM'S CORN EXTRACTOR. Do this, and you prevent corns. No matter if the corn is hard or soft. Let it be on top or between the toes, Putnam's will remove it without pain. Insist on PUTNAM'S CORN EXTRACTOR. It does the work—and roots out the corn, quickly and without pain.

A Clever Idea

The Durham Chronicle tells of a young man who visited a store in that town, purchased three dozen eggs on credit, took them to another store and sold them and used the money to buy gas for his car. This is probably the first instance of a thirty-six hen-power automobile.

Use Minard's Liniment for the Flu.

May Be the Reason

Women's feet are now two sizes larger than they were twenty years ago, according to an orthopedic expert. Is this because she has been trying to fill man's shoes.

Little Helps For This Week

"Give us this day our daily bread." Matthew vi. 11.

Master, help! From hour to hour, Lord, I need Thy saving power, Not to soothe tomorrow's woes, Not to bless tonight's repose. Now I hunger to be fed; Give today Thy daily bread.

Every moment hold my hand; Without Thee I cannot stand. Show my foot the place to tread; Step by step I must be led. Go before me all the way; Give me daily bread today!

—Rose Terry Cooke.

What is this bread, O my God? It is not merely the support which Thy providence supplies for the necessities of life; it is also the nourishment of truth which Thou givest each day to the soul. It is the bread of eternal life, giving it vigor, and making it grow in faith. Thou dost renew it every day. Thou givest within and without precisely what the soul needs for its advancement in a life of faith and renunciation. For whatever happens to me each day is my daily bread, provided I do not refuse to take it from Thy hand and feed upon it.

A steadily increasing group of words making its way into the dictionary is that of dialectal, provincial and local words and expressions.

An official report states that five hundred kinds of material are used for men's shoes.

Don't Neglect Bronchial Colds

Pneumonia, "flu" and other dangerous maladies develop from common colds. To prevent trouble take Buckley's Mixture. It quickly relieves the Cough and removes the cause. Different from old-fashioned syrups. It's a scientific combination of proven virtues. Sold by all druggists and guaranteed.

FLU Germs Breed In the Throat.

First Appear As A Common Cold, But Gain Tremendous Headway In Six Hours

SOME SIMPLE PRECAUTIONS AGAINST INFLUENZA

Simple precautions taken now will enable you to fight dreaded "flu" which is sweeping rapidly through the whole country. The germs of influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nervilleine. Half a teaspoonful of Nervilleine in water makes a most efficient gargle. The germ-killing properties of Nervilleine quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—he sure to rub the neck and chest with Nervilleine. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding germs. This combination treatment of Nervilleine and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 136 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let
**YOUR PLANTS

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

At The S. of A.

The Literary will present the year play on the evening of February 22 consisting of a rollicking farce in three acts entitled "His Uncle's Niece". An excellent cast has been selected. The players are working very hard to make it something worth while, come and have a good laugh.

On Wednesday night Mr. Gilbert gave an illustrated lecture on "Dickens's Christmas Carol," and "Flowers of Alberta."

On Tuesday Mr. Longman attended the short course given at the Lethbridge experimental farm.

On Wednesday Mr. Asplund gave a lecture on "Fattening and Marketing Lambs," at short course given at the Lethbridge Experimental Farm.

We are sorry to learn of the sudden death of Mrs. Haworth's sister in Edmonton. The students and staff extend the deepest sympathy to them in their recent bereavement.

On Monday Mr. MacDonald returned from Edmonton where he had been attending the Dairyman's Convention.

Master Film Production Of The Century Coming To The Capitol Theatre

"The King of Kings" the photoplay that is coming to the Capitol Theater for three days commencing next Thursday is beautiful, reverent, awe-inspiring, uplifting is the remarkable story of the greatest tragedy the world has ever known—the martyrdom and crucifixion of Jesus. An immortal, emotional, reverent drama of the Christ—the motion picture of the century—preeminently the greatest production ever shown on the screen. Supreme in theme—gigantic in execution—magnificent in investment—every biblical character of the days of the Passion superbly portrayed—acclaimed by world famed divines this is in truth, the PICTURE OF PICTURES.

The production should be seen by every man, woman and child in Raymond.

MODERN PHILOSOPHY

Did it ever occur to you that a man's life is full of crosses and temptations? He comes into the world without his consent, goes out against his will and the trip is exceedingly rocky.

The rule of the centuries is one of the features of this trip. When he is little the big girls kiss him. When he is big the little girls kiss him.

If he is poor he is a bad manager. If he is rich he is dishonest. If he needs credit he can't get it. If he is prosperous everybody wants to do him a favor.

If he is in politics it is for graft. If he is out of politics he is no good to the country.

If he does not give to charity he is a stingy cuss. If he does it is for show.

If he is actively religious he is a hypocrite. If he takes no interest in religion he is a hardened sinner.

If he gives affection, he is a soft specimen. If he cares for no one he is cold blooded. If he dies young there was a great future before him. If he lives to an old age he missed his calling.

If you save your money, your a grouch. If you spend it your a loafer. If you get it your a grafter. If you don't get it your a bum. So what the H is the use? Life is just one d thing after another.

The Stake M. I. A. will present the three act Comedy "Mr. Pim Passes By" at the opera house tomorrow. This is a cleverly written play replete with comic situations.

RECORDER HEARS FROM LE ROI STONE

The Recorder received a letter from Le Roi Stone telling us of the fine weather down there in California, and how he is enjoying his work—in part—"This is a wonderful work which I am engaged in. I am enjoying it very much, in fact getting fat on it."

"Success and happiness is my sincere wish for you all at home." We wish Le Roi the greatest of success in his labors.
